Better Approach to a Note Page

Benjamin Kellermann

Technische Universität Dresden

February 25, 2011

- this is a note
- do not forget to speak out loud
- be convincing
- the counter will start, when you leave the titlepage

   - Slide 8
   - Slide 9
   - Slide 10

Installation process

- configure your computer to 1400x1050

Benjamin Kellermann (TUD)   Better Approach to a Note Page   February 25, 2011   2 / 19

this: click / min
total: slide / min

Installation process

- configure your computer to 1400x1050

- this is only one frame, therefore the pagecounter counts for all pdfpages of this frame

Installation process

- configure your computer to 1400x1050
- configure the projector to have 1024x786

Benjamin Kellermann (TUD)   Better Approach to a Note Page   February 25, 2011   3 / 19

this: $\frac{click}{min}$

total: $\frac{slide}{min}$

Installation process

- configure your computer to 1400x1050
- configure the projector to have 1024x786

● this is only one frame, therefore the pagecounter
  counts for all pdfpages of this frame

this: click
                         min

total: slide
                         min

Installation process

- configure your computer to 1400x1050
- configure the projector to have 1024x786
- the projector should use some pic in pic feature and display the upper right part, e.g.:
  `xrandr --output VGA1 --mode 1024x786 --pos 376x0`

- this is only one frame, therefore the pagecounter counts for all pdfpages of this frame

Advantages of this Note Page

- you can use the navigation on the side instead of a navigationbar on the slides
- you can jump directly to pages (e.g., question from auditorium: "Can you please jump to slide 10 once more?")
- you can jump to sections/subsections as you want directly
- you can see the next slide, before it appears
- you can see the time (use the package option time=45 to let it count down from 45 minutes)

Benjamin Kellermann (TUD)　　　Better Approach to a Note Page　　　February 25, 2011　　　4 / 19

this: _____ click / min

total: _____ slide / min

Advantages of this Note Page

- you can use the navigation on the side instead of a navigationbar on the slides
- you can jump directly to pages (e.g., question from auditorium: "Can you please jump to slide 10 once more?")
- you can jump to sections/subsections as you want directly
- you can see the next slide, before it appears
- you can see the time (use the package option time=45 to let it count down from 45 minutes)

How to use the counter

- after you finished your talk, jump to the first page (Ctrl+Pos1)
- turn the counting off (click on the checkbox)
- you can go through the slides and look
  1. how long it took you to present one frame
  2. what was the total time, when you were at the certain frame
- click on "show summary" to get a summary (yes, this is a button ;-))
